

CUMBERLAND COUNTY CONSERVATION DISTRICT

41st ANNUAL TREE SEEDLING SALE

Thursday, April 19 1 pm – 5 pm
Friday, April 20 8 am – 2 pm

**Cumberland County Conservation District Office
310 Allen Road, Carlisle PA 17013**

Exit 44 (Allen Road exit) off I-81, located on Allen Road,
between I-81 and Ritner Highway (Rt. 11), across from Sheetz

ORDER DEADLINE- APRIL 2, 2018

You will receive a postcard as a reminder of the pickup dates and location.

*** Profits from the seedling sale benefit environmental
education and natural resources projects ***

- Two and Three Year Old Bare Root Seedlings
- Apple Tree and Pear Tree Packs
- Groundcover
- Wood Stakes
- Flowering Bulbs
- Wildflower Mix
- Tree Shelters

The District reserves the right to substitute a different size seedling for any species pending availability and adverse growing conditions.

The District cannot guarantee the success rate of bare root seedlings, just as our suppliers cannot guarantee seedling survival rates.

The District is not responsible for seedlings not picked up by 2:00 pm, April 20th.

Descriptions, pictures and order forms are available on the District website: www.cumberlandcd.com

No orders will be accepted via the internet – check must accompany order.

Any questions, call the Conservation District office at (717) 240-7812 or e-mail: conserve@pa.net

DESCRIPTIONS

COLORADO BLUE SPRUCE: Will reach 6 ft. in 8-9 years starting with three year seedling. Grows to 100 ft. One inch silvery blue to bluish green needles. Not all plants will have the bluish colored needles. Good for ornamental, colorful screen, windbreak or Christmas tree. Ordinary soil, average moisture. Full sun. Slow growing.

CANAAN FIR: Very similar to the Balsam and Fraser Fir. Grows 40 to 55 feet. Lustrous dark green to bluish green needles with silvery bands on the underside. Likes deep, well-drained loam with ample moisture. Full sun.

WHITE PINE: Will reach 6 ft. in 6-7 years starting with three year seedling. Will grow to 100 ft. A five needle pine, soft, light green-blue four inch needles. Good for windbreak or hedge. Dry or poorly drained soils. Full sun.

SCARLET MAPLE: Also known as Red or Swamp Maple. Growth 40 to 60 feet. Highly prized because of its bright red flowers in early spring before leaves appear. Medium to dark green leaves turn yellow to brilliant red in fall. An excellent wetland species.

CONCOLOR FIR: Also known as White Fir. Should reach 6 ft. in 8-9 years with three year seedling. Grows to 120 ft. Silver trunk and soft silver foliage. One of the best Christmas trees. Holds needles best of any short-needled tree. Needs good drainage.

WHITE OAK: Grows 50 to 80 feet in height and as wide. Grows best in a deep, loamy, well drained soil. The most prolific lumber oak in the Northern Hemisphere. A good tolerance of highway salt. Wetland species. Broad, round, dense head, spreading branches and purple-red fall color.

RED OAK: Fast-growing oak, maturing with a broad round head, leaves turn a red to reddish-brown in Autumn. Will tolerate a wide range of soil types from acid to alkaline. Mature height 75 to 80 feet.

PEAR TREE PACK: Includes one each: ***Harrow Sweet:*** A late season pear developed by the Harrow Research Station in Ontario, Canada, AC Harrow Sweet ripens approximately three weeks after Bartlett. This variety has shown very good resistance to fire blight. The fruit size and appearance are similar to that of Bartlett; however, AC Harrow Sweet does develop an attractive blush. The tree should be trimmed to maintain fruit size and avoid biennial bearing.

Shenandoah: Another release from USDA and OSU, Shenandoah harvests approximately three weeks after Bartlett. Fruit size is large with traditional sub-acid pear flavor. Blight resistance is good and similar to that of Seckel. Shenandoah stores very well for up to five months without breaking down. ***Note: To get proper pollination, varieties should be planted no farther than 50 ft. apart. Semi-dwarf***

APPLE TREE PACK: Includes one each: ***Enterprise:*** Developed by Purdue University, this is a late-maturing, deep red apple with good keeping qualities. Fruit is uniform and medium to large in size. Tree is vigorous and spreading, with good annual bearing habits. Enterprise is highly resistant to fire blight and cedar apple rust. It is becoming an important processing variety. ***Golden Delicious:*** A russet-resistant selection of the original Golden Delicious. One of the most widely planted apple cultivars worldwide. Fruit is firm, medium to large with the classic Golden Delicious flavor. The tree is spreading, productive and easy to manage. Fruit thinning is required to maintain annual bearing. ***Initial:*** A scab resistant variety developed at INRA Angers, France. A Gala x Redfree cross. Fruit has good size and has a red blush over a yellow background. Variety is prone to fruit drop making it an ideal selection for food plots. Tree is relatively non-vigorous and fruit is crisp with mild acidic flavor. Matures in late August. ***Note: To get proper pollination, varieties should be planted no farther than 50 ft. apart. Can expect trees to start producing a small number of apples in 3 to 4 years. Should be fully producing apples in the 5th year. All semi-dwarf and will grow 12-14 ft. in height.***

PEACH: Redhaven Peach: This variety is considered by many as the standard for the Northeast peach industry. Tree is vigorous, very bud-hardy and productive. Fruit is medium-sized and colors to a brilliant red. One of the best commercial varieties. Ripens around August 1 in southcentral Pennsylvania.

MYRTLE (PERIWINKLE): (2.25" peat pots – 50 per flat) An excellent groundcover for both sun and shade; a short evergreen perennial groundcover that matures at about 6" tall and 3' in diameter for each plant. Performs best in rich, evenly moist, well drained soils in partial shade, but is adaptable to soils of average fertility. Blue-purple blooming in late March and April but numerous times throughout the growing season.

SHOWY NORTHEAST NATIVE WILDFLOWER & GRASS MIX: Little Bluestem; Sideoats Grama; Virginia Wildrye; Partridge Pea; Tall White Beardtongue; Smooth Blue Aster; Purple Coneflower; Marsh Blazing Star; Butterfly Milkweed; Lanceleaf Coreopsis; Blackeyed Susan; Oxeye Sunflower; Ohio Spiderwort; New England Aster; Maryland Senna; Blue False Indigo; Smooth Blue Aster; Browneyed Susan; Wild Bergamot; Wild Senna; Early Goldenrod; Narrowleaf Mountainmint; Orange Coneflower; Yellow False Indigo; Licorice Scented Goldenrod; Eastern Columbine; Gray Goldenrod; Hairy Beardtongue; Zigzag Aster; Golden Alexanders.

TREE SHELTER: This is a light plastic tube ranging from 2 – 5 feet in height. Protects seedlings from deer, rabbits and vols. Increases survival rate and growth. Not recommended for evergreens.

2018 Tree Seedling Sale Order Form

Deadline to Order - April 2, 2018

SEEDLINGS & SIZE		QUANTITY PER PACKET	# OF PACKETS	COST PER PACKET	TOTAL
Colorado Blue Spruce	15-18 inches	10		\$9.00	\$
